

THE BEST IN ELECTRICAL SYSTEM MONITORING

EXPERTISE | SERVICE | PREVENTION

We offer peace of mind to Canadian farmers with our innovative electrical monitoring technology, continuous real-time monitoring and a technical team that supports them in case of alarm.

THE PREVTECH DIFFERENCE

- A technical service team that supports the customer in case of alarm
- Proactive assistance in finding the best solution for each case
- A monitoring solution that has been proven in the field
- Over 1,000 satisfied customers across the country

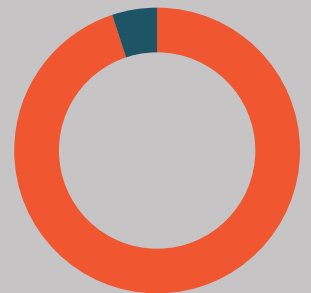

PREVENTION IS

5%

Detection of faults

95%

Follow-up, expertise and corrective measures

More than just installing monitoring equipment – PrevTech provides full-service, electrical security expertise.

WE PRIORITIZE ALARMS

90%

of alarms and notifications from various farm systems are easily ignored by farmers.

Our active monitoring allows us to take the necessary measures when a risk is present.

DID YOU KNOW?

55%

of alarms handled by PrevTech require the assistance of our technical team.

PREVENTION IS IN OUR DNA

ALERTS ALONE DO NOT PREVENT FIRES

Other electrical network monitoring solutions inspired by our technology exist on the market, but our approach remains unmatched. PrevTech is the only prevention solution that includes a complete technical service that accompanies the customer and his electrician when corrective action is required.
